DETAILED ACTION

1. Claims 1, 3-6, 8-11, 13-15, and 21-23 are pending in the present application.
2. Claims 2, 7, 12, 16-20 and 24 have been cancelled. Claims 1, 3, 6, 8, 11, 13 and 15 have been amended.

Drawings

3. The drawings were received on August 8, 2006; these drawings are acceptable.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1, 3-6, 8-11, 13-15 and 21-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of the claim appears to be directed to an abstract idea that does not present a useful, concrete tangible result. Note the claims do not recite steps for outputting or displaying the sorted items. Claims 3, 4, 5, 8-10, 13-15 and 21-23 are rejected based on dependency.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2168

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1, 3-6, 8-11, 13-15, and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiyoshi US Patent 6,601,067 B1 in view of Schindler US Patent 6,199,064 B1.

Regarding claim 1, Hiyoshi teaches "a sort controller receiving a plurality of information items regarding content" note *sort/merge processor 10* figure 1. Hiyoshi teaches *input files* for receiving a plurality of information, information is read through *file reading unit 15* figure 1. Hiyoshi teaches "wherein the sort controller sorts the information items" note *sort/merge execution unit 18* figure 1, also see column 4 lines 10-20. Hiyoshi does not specifically teach "primary and secondary sort keys derived from predetermined user sorting preferences for a current user task context and content type", however this feature is taught by Schindler. Schindler teaches items are

sorted by the value of their context and that the context is used to define the primary sort key and the secondary sort key [see: column 7 lines 45-65 items are sorted by the value of their context ; column 8 lines 39-66; and column 11 lines 30-39 "using the context to define the primary sort key" and "deriving a secondary sort key"]. It would have been obvious to one of ordinary skill at the time of the invention to have combined Schindler with Hiyoshi because Schindler teaches how the primary and secondary sort keys are derived from a function of the context for sorting.

8. Regarding claim 3, "wherein a primary sort key is selected by the user and a secondary sort key is selected based on the nature of the current user task" [note: Hiyoshi Figure 1 rule setting unit 14 and extraction criteria 13; also note Schindler, col. 11 lines 29-39].

9. Regarding claim 4, "wherein a change in the current user task context is inferred from a change of the primary sort key by the user" [see: Schindler Figure 9 (435)].

10. Regarding claim 5, "wherein the plurality of information items are displayed in an order determined by the sort controller" [note: Hiyoshi, column 4 lines 28-32 and lines 53-55].

11. The limitations of claims 6 and 8-10 have been addressed above except for the following: an audio receiver, Internet access, and remote control device [note: Hiyoshi input device 28 figure 2, column 5 lines 25-34].

12. The limitations of method claims 11 and 13-15 parallel system claims 1 and 3-5; therefore they are rejected under the same rationale.

13. Regarding claims 21-23, a user interface communicably coupled to the sort controller to receive user input identifying the current user task context [note: Hiyoshi, column 4 lines 40-55; also note interface 26 Figure 2].

Response to Arguments

14. Applicant's arguments with respect to claims 1, 3-6, 8-11, 13-15, and 21-23 have been considered but are moot in view of the new ground(s) of rejection.

In the response Applicant argued, independent claims 1, 6 and 11 have been amended to recite sorting information items using primary and secondary sort keys derived from predetermined user sorting preferences. In response, note newly cited reference *Schlindler* teaches how primary and secondary sort keys are derived. Also, note new rejection cited under 35 USC 101. *Schlindler* was cited on form PTO 892 mailed April 28, 2005.

Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lee et al. US Patent 5,148,541

Lawton US Patent Application Publication No. 2002/0078023

16. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
